

Erfan Nemati
Technical Product Manger

DoB: 1998-10-24
Marital Status: Single
Military Service: Educational Exemption

Email: i@kingslyen.ir

Mobile: (+98)9192164319

Website: <https://KingslyEn.ir>

Address: Tehran, Iran

Profile Summary

I'm interested in product management and startup environments, so far I have been the co-founder of two startups in EdTech and Ecommerce. I'm eager to brainstorm, create and develop new products and MVPs. I'm a huge fan of soccer and I play chess daily! Overall, I'm close to being a technical product manager in terms of technical knowledge, problem-solving skills and soft skills that I have, also I'm open to learning new things. I have ENTJ-T personality. I prefer to work in a company with the possibility of recruiting soldiers.

Work Experience

■ Product Owner (Content and Product)

Welearno
Tehran, Iran
February 2018 - December 2019

Tasks and Achievements

- I started working as an editor and developer of multimedia, and over time I became responsible for the product and business relationship with the technical teams.
- Increase content production speed (nearly 5 times) with development in an open source script.
- Responsible for business communication and technical teams, document preparation and source code control.
- Training new forces.

■ Technical Product Manager

SQUAD
Iran
September 2020 - July 2021

Tasks and Achievements

- Squad is a global social commerce startup in the group purchasing field and with the prospect of entering to Fintech. I was with the Squad from the idea generation stage.
- Developing MVP website and required customizations with Shopify and WordPress.
- Designing Instagram and Telegram bots and connecting them to the MVP sites.
- Optimizing shipping process with the help of the Ops team.
- Achieving more than 1000 users and 1600 orders in less than 2 months, with the designed MVP.

Since 2018

GPA : 16.68

Projects

TraderASS

For: Myself

September 2021

TraderASS is an automation assistant in stock exchange and cryptocurrencies market by combining data science and artificial intelligence models. I decided to work on my own side project and try to get to align and integrate all the skills that I have learned before on this project. I've started developing this product from scratch and quite principled. •Designing product vision, product development flow, product roadmap and systems architect till now.
